

CLAIMS

I claim:

- 1 1. A desiccant bottle cap, comprising:
2 a cap having a closed end and a rim depending from the
3 closed end; and
4 a desiccant packet adhered to the closed end of the cap.
- 1 2. The desiccant bottle cap according to claim 1, wherein
2 the rim is internally threaded for attachment to a threaded
3 bottle.
- 1 3. The desiccant bottle cap according to claim 1, wherein
2 said cap is made from plastic.
- 1 4. The desiccant bottle cap according to claim 1, wherein
2 said cap is made from metal.
- 1 5. The desiccant bottle cap according to claim 1, further
2 including a bottle cap liner disposed between the closed end of
3 said cap and said desiccant packet.
- 1 6. The desiccant bottle cap of claim 5, wherein said liner
2 is made from cardboard.

1 7. A desiccant bottle cap, comprising:
2 a cap having a closed end and a rim depending from the
3 closed end; and
4 a desiccant insert forming a snap fit into the closed end,
5 the desiccant insert including a cap liner, a porous material
6 attached to the cap liner, and a desiccant material sandwiched
7 between the cap liner and the porous material.

1 8. The desiccant bottle cap according to claim 7, wherein
2 said desiccant material is a loose, aggregate material.

1 9. The desiccant bottle cap according to claim 7, wherein
2 said desiccant material is provided as a disk.

1 10. The desiccant bottle cap according to claim 7, wherein
2 said porous material is paper.
